LANDSCAPE ARCHITECTURE

Hardy Trees, Shrubs and Vines

A Landscape Plan for Your Home

Change your grounds from an ordinary yard to a place of beauty, the cost is small and you will have something of enduring value, artistic, and satisfying to show for the money you spend on your grounds. Many people come to us who have spent considerable time and money with no pleasing results. Here is the trouble with most of us: We plant a tree and a rose now, then two or three shrubs and a few more later, and have no definite scheme. We wind up just about where we started. The beauty of planting depends greatly on the preparing, grouping and arrangements.

When Landscape Gardening is mentioned many people think of vast estates and the expenditure of large sums of money, but this is a mistaken idea, for the small and medium sized places lend themselves to artistic treatment fully as well as larger ones.

PLANTING PLANS

Parties desiring the services of a Landscape Gardener will do well to correspond with us before contracting this work, as we can have one of our men call, if within a distance of 200 or 300 miles of our nurseries, and look over the work, make out planting plans, supply the nursery stock, and if a satisfactory man cannot be had to do the planting, we can send a man from our nurseries to oversee the planting.

VALDESIAN NURSERIES

Bostic, North Carolina

We Cordially Invite You

BOSTIC is situated in Rutherford County, at the junction of the Seaboard and Carolina, and the Clinchfield and Ohio Railways. We are two and one-half miles from Forest City, which is on the Southern Railway, and are within one mile of the State Highway from Wihmington to Asheville. We will be glad to welcome our friends either in Bostic, or in Forest City.

We want regular customers, and are scrupulously honest with everyone, taking care to fill even the smallest orders just as carefully as the larger ones. Our policy is to grow specimen evergreens, that one may beautify his grounds now, without having to wait years for seedlings to develop. We have thousands of plants growing in our nurseries that it took years to develop.

Any banker or business house in any city can tell you that we are reliable, and that you will be safe in placing your order with us.

In sending our man to see the grounds, to lay out and make plans, we only charge railroad fare and expenses while away from the nursery, provided the stock is bought from us, but if this work is not done and planting stock is not supplied by us, besides railroad fare and expenses, we charge a reasonable price for our Gardener's services which can be agreed upon beforehand, if desired.

Discounts to Ministers and Churches

We have made it a custom for a number of years to allow a discount to ministers for their home or parsonage planting, as we also do for church planting. Quite a number have, during the past season, ordered for these plantings, and they have been highly pleased.

We also allow a reduction in the prices of stock for use in the improvement and beautifying of cemetery grounds. We have thousands of plants especially suited for such plantings, and we will be glad to hear from any one wishing to make these improvements.

Baptist Parsonage and Church, Forest City, N. C.

Hardy Evergreens

Coniferous evergreens are particularly valuable in all classes of ornamental plantings. Every efficient Landscape Gardener knows that no grounds are complete without plantings of coniferous as well as deciduous shrubs.

During the summer months, when every tree and shrub is full of foliage, deciduous stock looks all right, but it appears lonesome during six months of the year.

For many years we have made the growing of evergreens our specialty. We have them growing in our nurseries, from the propagating beds to large specimens ten or more feet in height. Here we transplant them many times to develop their root system.

Our shipping season begins in September and we can make prompt shipment, weather permitting, continuing in the spring until new growth is too far advanced for removal.

The prices in this booklet are for plants packed and F. O. B. here.

To nearby points, arrangements may sometimes be made that we make delivery by truck.

In carload shipments of evergreens, they are dug with a ball of earth, which is burlapped around the roots.

Parties in this and adjoining states, who wish to purchase in car lots, can, by arrangements with us before shipment, secure at reasonable cost the services of our Landscape Gardener, who will direct the planting of the stock. This will be a man who has spent years in the growing of coniferous evergreens and who "KNOWS HOW."

SCREEN PLANTING

The planting of evergreens for screens or breaks can be made to do much more than beautify. For instance, there may be an unsightly view from some of your windows, an unkept vacant lot, the service yard, or a neighbor's place, or perhaps your own back yard. Light from the other's house or from the street may annoy you. You have not the feeling of seclusion you would most enjoy, and the planting of deciduous trees and shrubs could not be satisfactory. During the winter months, when you spend more time in your own home, a more serviceable and beautiful type of screen to plant would be our Hardy Coniferous Evergreens. We have many sorts suitable for screen planting, and where it is desirable can ship in car lots of large sizes that will bring beauty and seclusion NOW.

A Screen Planting

THE ARBORVITAE—THUYA

This group of ornamentals is among the loveliest of evergreens, including many varieties of upright growth, and adapted to small lawns as well as large areas. Medium size and delightful shape, fine color and beautiful foliage, combined give it first place in planting for lawns or banking.

The taller-growing sorts make a splendid background for other ornamentals and provide protection and seclusion for the flower vegetable garden.

With the Biotas and Junipers, it supplies the choicest groups for large or small plantings.

American Arborvitae (T. Occidentalis)—The most popular of the Arborvitae family, more widely planted for lawns, groups or hedges, makes a beautifully shaped tree, succeeding in all soil. It is especially valuable on account of its atmospheric odor. It forms an upright conical tree of medium size. It is valuable for screens or hedges, and can be trimmed like privet. Where mixed conifers are used for grouping it is always used to advantage. We can supply all sizes in this variety, running as large as 10 feet.

	Each	Per 10
18 to 24-inch	\$ 1.50	\$12.50
2 to 3 feet	2.50	22.50
3 to 4 feet	4.00	35.00
4 to 5 feet	5.00	45.00

Globosa (T. Globosa)—A dense thick evergreen of dwarf habit, grows naturally round like a ball and one of the best varieties, used in all plantings, and especially suited for tubs or box plantings, corners or outer edges and groupings.

	Each	Per 10
12 to 15-inch	\$2.00	\$20.00
15 to 18-inch	3.00	30.00

Orientalis (T. Orientalis)—A pretty pyramidal or torch-shaped evergreen with erect branches and dense flat foliage of bright green color. A very popular sort. One gardener told us he did not want a better evergreen than the Orientalis.

	Each	Per 10
12 to 18-inch	\$1.00	\$ 9.00
18 to 24-inch	1.50	14.00
2 to 3 feet	2.50	22.50
3 to 4 feet	3.50	32.50
6 to 8 feet	7.50	70.00
8 to 10 feet	10.00	85.00

Pyramidal (T. Occidentalis)—A most compact and erect sort. In erect form it almost equals the Pyramidal Juniper. Foliage deep green retaining its color throughout the year. Is called spiral shaped. Fine for tub, porch or special plantings. Used for piers, columns like Junipers.

	Each	Per 10
18 to 24-inch	\$1.50	\$12.50
2 to 3 feet	2.50	22.50
3 to 4 feet	3.50	32.50
4 to 5 feet	5.00	45.00
5 to 6 feet	6.00	60.00

Specimen plants, sheared, compact pyramidal form, 6 to 7 feet, \$7.50 each.

Siberian (T. Occidentalis Siberica)—Globular in shape while young, but as it attains age, assumes a more upright habit. Foliage a handsome shade of green.

	Each
1½ to 2 feet	\$2.00
2 to 3 feet	4.00

Tom Thumb (Ellwangeriana)—Small compact Arborvitae with feathery-like foliage; dense habit; soft, close texture. Forms low pyramid.

	Each	Per 10
8 to 10 inch	\$1.50	\$12.50
12 to 18 inch	2.50	20.00

North Carolina

Valdesian Nurseries
Bostic, N. C.

Gentlemen:

The shrubs for our church arrived in first class condition, and we are very much pleased with them. We wish to thank you, personally, for the lovely plants you sent and to express to you our sincere appreciation for your kindness to us. Especially do we appreciate the two beautiful Biota Aurea Nana plants that you sent for the special addition to our order. We have never seen prettier plants and we are very grateful to our Virginia friend—Mrs. B. Y. Tyner of the State Teachers' College, Fredericksburg, Virginia, for making this contribution to our church planting, and to you for the selection sent.

The college is also delighted with their planting.

Yours very truly,

Mrs. John A. Bivens.

Biota Aurea Nana

BIOTAS

Biota Aurea Nana—We believe this to be the best dwarfish evergreen in cultivation. It is a compact grower with yellow foliage, always shapely, and one of the most popular evergreens we have. Where a small-growing sort is wanted, we know of no other kind so desirable as this splendid variety, which may be used either singly or in groups for lawns, for borders or for banking in front of porches.

	Each	Per 10
12 to 15 inch.....	\$1.50	\$14.00
15 to 18 inch.....	2.00	20.00
18 to 24 inch.....	4.00	37.50
24 to 30 inch.....	5.00	48.00

Biota Blue Green—A handsome evergreen with beautiful bluish-green foliage that it retains throughout the winter. It is a dwarfish grower, making a pretty little tree and will add beauty to any collection. Fine for banking among other sorts.

	Each	Per 10
12 to 18-inch.....	\$1.50	\$15.00
18 to 24-inch.....	2.50	25.00
24 to 30-inch.....	4.00	40.00

Biota Conspicua—This is a beautiful pyramidal evergreen of intense golden foliage. It is a variety we have never been able to get a large stock of, because most everybody seeing them desire some of them among their plantings. They are almost pyramidal and of dense foliage, and owing to their beautiful golden color they make a fine contrast among other varieties.

	Each	Per 10
18 to 24-inch.....	\$2.50	\$25.00
2 to 3 feet.....	3.50	35.00
3 to 4 feet.....	5.00	50.00
4 to 5 feet.....	6.50	60.00

Biota Pyramidalis—Compact and of narrow pyramidal growth. Its branches are short and densely clothed with bright green foliage. It retains its color throughout the winter better than many other sorts, and for this reason, together with its attractive pyramidal form, it is one of the most valuable evergreens. They are appropriately used for entrance, walks, corners, porch columns, piers, etc., and are also pretty and attractive in groups and various other plantings. Small ones are used among window box planting or tubs and porch boxes.

	Each	Per 10
18 to 24-inch.....	\$2.00	\$20.00
2 to 3 feet.....	3.00	30.00
3 to 4 feet.....	4.00	40.00
4 to 5 feet.....	6.00	50.00

Biota Rosedale—Foliage very fine, assuming a purplish hue in winter. A dwarfish and attractive variety, distinct from other evergreens. People who visit the nurseries usually include some of this variety. Used for banking among evergreens and for various other plantings.

	Each	Per 10
10 to 12-inch.....	\$1.25	\$10.00
12 to 18-inch.....	1.50	15.00
18 to 24-inch.....	3.00	30.00
2 to 3 feet.....	5.00	45.00

North Carolina

Valdesian Nurseries

Bostic, N. C.

Gentlemen:

The plants came in good condition and were all lovely. The vacant places look much better, and from time to time I hope to be able to do more business with you.

Sincerely,

Mrs. Walter H. Powell.

CEDARS

Cedrus Atlantica (Mt. Atlas Cedar)—Hardy, and one of the most beautiful of all cedars.

	Each
18 to 24-inch.....	\$2.50
24 to 30-inch.....	3.50
30-inch, and over.....	5.00

Cedrus Deodara (Indian Cedar)—A majestic tree of pyramidal outline from the Himalaya Mountains. Foliage grows in tufts or fascicles and of a bluish-green color. The color is nearly as deep blue as Koster's blue which it retains throughout the year, but it is unlike the Spruces in that it grows throughout the season, whereas the Spruces only grow in early spring. It is a most desirable variety for lawns, corners and various other plantings, but it is not suited for banking.

	Each	Per 10
12 to 18-inch.....	\$ 1.50	\$12.50
18 to 24-inch.....	2.00	17.50
24 to 30-inch.....	3.50	30.00
30 to 36-inch.....	4.00	35.00
3 to 4 feet.....	5.00	45.00
5 to 6 feet.....	7.50	70.00
6 to 7 feet.....	10.00	90.00

Virginia Glauca (Blue Cedar)—A pyramidal variety with silvery-blue foliage. Distinctive and very desirable. They naturally grow into dense and shapely plants without trimming. Their rich blue foliage and erect habit of growth lend beauty and attraction to the most expensive plantings. **THEY ALL WANT IT.**

	Each	Per 10
2 to 3 feet.....	\$ 4.00	\$35.00
3 to 4 feet.....	5.50	50.00
4 to 5 feet.....	7.50	70.00
7 to 8 feet.....	12.50	100.00

Cedar Red (Cedrus Virginiana)—An attractive and popular tree. Sometimes attains a height of 20 to 25 feet. It is pyramidal shape and very hardy. Fine for backgrounds, drives, and roadways. Turns to purplish-bronze in winter.

	Each	Per 10
2 to 3 feet.....	\$2.00	\$20.00
3 to 4 feet.....	3.00	30.00
4 to 5 feet.....	5.00	50.00
5 to 6 feet.....	6.00	60.00

Cedrus Libani (Cedar of Lebanon)—A tree frequently referred to in the Scriptures; perhaps the most beautiful of all cedars. The foliage is very dense and closely woven. In shape, the leaves are straight, tapering, cylindrical and pointed; they are about an inch long, and of a dark green color and grow in alternate tufts of about thirty in number. They flourish in most foreign countries and in North America and South America. In Europe it is extensively cultivated for ornamental purposes, where it is said to attain greater age and retain its beauty for centuries. From the noted Mr. Ellis' writings, we quote:

"As I strolled among the flowers and blossoming fruit trees, I found myself under the famous old cedar of Lebanon, which is the pride of the campus for the American College for Girls in Constantinople. This particular tree, the president of the college told me a few days ago, is more than eleven hundred years old, according to the records. It had lived for centuries before the Crusaders sossadly sacked Constantinople. It was mature before the first Turk set foot upon the soil of Asia Minor. What a picture of history it would be if one could visualize the procession of persons who have stood under this tree looking across the Sweet Waters of Asia during the past thousand years, and still the giant that has survived the fierce storms that sweep down from the Black Sea, is symmetrical and beautiful and as alive as ever."

	Each	Per 10
18 to 24-inch.....	\$ 2.00	\$17.50
2 to 3 feet.....	4.50	40.00
4 to 5 feet.....	6.50	60.00
5 to 6 feet.....	10.00	80.00

A Foundation Planting

CYPRESS

Italian Cypress (*Cupressus Sempervirens*)—A distinct variety, the foliage being almost a deep blue. Has tapering branches lying close to the stems. Grows very erect and shapely. Fine for landscape work in grouping, borders or single specimens. Its foliage and very erect growth makes it a most desirable variety for finest plantings. For years we have had calls for this variety but have only recently been able to obtain sufficient plants to offer in quantity.

Arizona Cypress (*Cupressus Arizona*)—A splendid new variety of good growth and of slender, pyramidal habit. Foliage bluish-green. Very hardy and rare.

	Each	Per 10
18 to 24-inch.....	\$1.50	\$12.50
2 to 3 feet.....	3.00	25.00
3 to 4 feet.....	5.50	40.00
4 to 5 feet.....	6.00	50.00
5 to 6 feet.....	7.50	70.00

Lawsonian Cypress (*Chamaecyparis Lawsoniana*)—Has pendulous branches like ostrich feathers and foliage of silver gray sheen. This graceful tree makes a fine specimen if planted alone. Its elegant, drooping branches and dark, glossy, green foliage, tinged with its glaucous hue makes it one of the rarest and most valuable sort.

	Each	Per 10
2 to 3 feet.....	\$3.00	\$25.00
3 to 4 feet.....	4.00	35.00
4 to 5 feet.....	5.00	45.00

FIRS

Douglas Fir (*P. Douglassii*)—This succeeds better in the South, and in other sections south of Massachusetts than any other variety we know. The Douglas is a healthy grower, conical in form with spreading horizontal branches. Foliage light blue above with silvery-white below.

	Each	Per 10
2 to 3 feet.....	\$ 4.00	\$35.00
3 to 4 feet.....	5.50	50.00
4 to 5 feet.....	6.50	60.00
5 to 6 feet.....	7.50	70.00
6 to 8 feet.....	10.00	80.00

HEMLOCK—TSUGA

Carolina Hemlock—Compact graceful tree of rare beauty. Its hardiness, dense, drooping foliage and beautiful form makes it rank among, if not ahead, of the Japanese sorts. Its fine feathery foliage makes a splendid contrast among other evergreens for lawn or park planting, and one could not think of anything finer for border or screen.

	Each	Per 10
18 to 24-inch.....	\$3.00	\$25.00
2 to 3 feet.....	4.00	35.00
3 to 4 feet.....	6.00	50.00
4 to 5 feet.....	7.50	65.00

Hemlock (*Canadensis*)—A medium size graceful evergreen tree of dense growth, branches thickly set with beautiful, drooping, feathery foliage of a darker color than the Hemlock Caroliniana. It lends an attractive appearance in grouping, owing to its drooping branches and feathery-like foliage.

They bear trimming at any time of the year and are among the best evergreens for hedging. After being cut back a number of times, they become thick and dense, and with their graceful and feathery-like foliage, they make beautiful evergreen hedges.

	Each	Per 10
10 to 12-inch.....	\$ 1.00	\$ 7.50
12 to 18-inch.....	1.50	12.50
18 to 24-inch.....	2.50	22.50
24 to 30-inch.....	3.50	30.00
30 to 36-inch.....	4.50	40.00
4 to 5 feet.....	5.50	50.00
5 to 6 feet.....	7.50	70.00
6 to 7 feet.....	10.00	80.00
7 to 8 feet.....	12.50	100.00

JUNIPERS

Juniper Pyramidal (*Hibernica* or *Irish*)—One of the most popular Junipers in cultivation, slender, rigidly upright and formal evergreen in character, resembling a solid green column. The underside of its foliage is of a silvery-gray while the tip is green color. Perfectly hardy retaining its beautiful color throughout the year. It is used in various plantings. Where groups are wanted and height is desired there is nothing prettier than a large clump of pyramidal Junipers. One of the most popular sorts for piers, columns, or corners.

Juniper Glauca (*New English*)—A fine evergreen with distinct blue foliage, known by some as *New English Glauca*, is not so dense or columnar as the *Irish*. Where a little more spreading variety is desired, this is an ideal sort. They are always pretty, do not color up in the hardest of winter weather, and when planted

Pfitzer's Juniper

singly, in groups or used in banking, they stand up making a prominent and attractive outline.

	Each	Per 10
12 to 18-inch.....	\$1.00	\$ 7.50
18 to 24-inch.....	1.50	12.50
2 to 3 feet.....	2.50	22.50
3 to 4 feet.....	4.00	35.00
4 to 5 feet.....	5.00	45.00
5 to 6 feet.....	6.50	60.00
6 to 8 feet.....	8.00	75.00

Juniper Chinensis Pfitzeriana—The handsomest of Chinese Junipers, and a most satisfactory, low, spreading or prostrate type of Junipers. Perfectly hardy and very desirable for the South. Its distinctive grayish color and irregular flat spreading growth makes it unusually attractive.

For terrace planting, foundations or low groups, as single specimens, I know of no variety more valuable than Pfitzeriana.

	Each
12 to 15-inch.....	\$1.50
15 to 18-inch.....	2.50
18 to 24-inch.....	3.00

Juniper Communis Depressa—One of the best prostrate forms of Juniper for ground covering. It will grow on sandy or gravelly hillsides. It may be appropriately used for borders, banks or edgings.

	Each	Per 10
12 to 18-inch.....	\$1.50	\$12.50
18 to 24-inch.....	2.00	20.00

Juniper Excelsa Stricta—A very symmetrical conical outline with steel blue pointed leaves which stand erect. Foliage glaucous and arranged around the branches in threes. A fine compact variety for all purposes and especially where formal effect is desired. Fine decoration for box or tub planting.

	Each	Per 10
12 to 18-inch.....	\$2.00	\$18.00
18 to 24-inch.....	3.00	25.00
24 to 30-inch.....	5.00	45.00

Juniper Sabina (Savin Juniper)—A spreading form with dark green foliage. It is valuable for rockeries, groupings and borders, making a fine effect with other sorts. It is a popular variety, which up to this time we have never been able to grow enough to supply the demand. At present we have a large lot of them coming on and can supply same in quantity.

	Each	Per 10
12 to 18-inch.....	\$2.00	\$17.50
18 to 24-inch.....	3.00	27.50

HEATHER

Heather, Swedish—The Heathers are among the most beautiful of evergreen flowering shrubs and in groups and masses, or even in single specimens, lend a striking appearance to any planting.

We have tried a number of varieties but find only the Swedish variety succeeds here. We have a nice lot of beautiful little plants.

	Each
12 to 15-inch, bushy plants.....	\$1.50

A small group of Evergreens will add greatly to the beauty and value of your home.

RETINOSPORAS

Retinospora Plumosa Aurea—A compact tree of regular outline. Foliage plummy and graceful, tinged with a golden hue, which makes it a very striking and beautiful evergreen. A small group of this variety adds strikingly to the surroundings. They are used in various ways like other evergreens, making a beautiful contrast among groups and other plantings.

Retinospora Pisifera Argentea—A splendid dwarf compact variety. This is a beautiful little evergreen of thick, dense foliage with silvery-tipped branches. Splendid sort for boxes, tubs, urns for steps or porch planting, and where dwarf sorts are needed it is a most desirable variety.

Retinospora Squarrosa Veitchii (Silver Cypress)—Has beautiful soft, steel-gray foliage, a distinct variety, and a great favorite with those who know it.

Retinospora Pisifera Plumosa—With plummy green foliage but of the same nature and habit as the Aurea variety, with the exception of color, and is a very popular sort.

Prices on all Retinosporas:

	Each	Per 10
18 to 24-inch.....	\$2.00	\$17.50
2 to 3 feet.....	3.50	32.50
3 to 4 feet.....	5.00	45.00
4 to 5 feet.....	6.00	55.00

SPRUCES

Norway Spruce (P. Excelsa)—A most desirable evergreen for all purposes. For ornamental planting in groups around large estates or parks as a wind-break, for orchard, farm house or as a fence or hedge, it is a most desirable variety. It is absolutely hardy, a good grower, its branches being of a drooping habit. If planted in rows and not pruned it soon becomes an excellent screen, but it can be pruned to any height. If it is to be kept into a hedge it should be trimmed in June and October. It can be made dwarfish and very attractive by shearing off the ends of the branches each season. Bears transplanting well and will grow under all conditions, even in crevices of rocks and on hillsides where it would be impossible for other trees to get nourishment. When the snow covers the earth like a blanket, the foliage of a Norway Spruce brightens the surroundings and makes us forget the dreariness of old winter.

White Spruce (Picea Alba)—A compact pyramidal form. Has greater symmetry than Norway Spruce, is not as vigorous grower, has elegant silvery-gray foliage and makes a beautiful little tree. Can be used for all purposes for which the Norway is used, and more, owing to its being a compact dwarfish grower. They may be used for bordering small plantings. They too, like Norway, will thrive in most all soils and are perfectly hardy.

Colorado Blue Spruce (P. Pungens)—A very shapely and popular Spruce. In color it is a bluish-green, and while even small plants are attractive, each year's growth brings greater beauty. A few well grown specimens make an almost priceless addition to a well-kept lawn. This tree is a native of Colorado. They are grown from seed and vary in color just a little, many of them being of a little deeper blue than others grown from the same bed.

Spruce Makes a Good Windbreak

The intense blue can only be had in the grafted sorts known as "Koster's Blue," but the Colorado Blue is a desirable sort.

Prices on all above Spruces:

	Each	Per 10
18 to 24-inch.....	\$1.50	\$14.00
2 to 3 feet.....	2.50	22.50
3 to 4 feet.....	4.00	37.50
4 to 5 feet.....	6.00	55.00

Koster's Blue Spruce (*Picea Pungens Glauca Kosteriana*)—The most popular blue evergreen among the spruces and so generally used for lawns and specimens. This variety is identical in growth with the Colorado Blue, but has the bluest strain of foliage, being grafted from the famous Koster's variety. They are healthy and make beautiful trees, being attractive at all seasons. They do not make large trees but owing to their intense bluish color, if a few of them are scattered about the lawn they will lend attraction to the surroundings.

	Each	Per 10
12 to 18-inch.....	\$4.00	\$35.00
18 to 24-inch.....	6.00	50.00

TAXUS CANADENSIS

Taxus Canadensis (Canadian Yew)—A dwarf like evergreen with spreading habit. Fine for banking among evergreens. Very hardy and especially useful for shady places, valuable for beds or forming groups, bearing dark green foliage and crimson berries.

	Each	Per 10
12 to 15-inch.....	\$1.50	\$14.00
15 to 18-inch.....	2.50	22.50
18 to 24-inch.....	3.00	25.00

PINUS—PINE

Pinus Densiflora (Japanese Red Pine)—This is the dwarfed Japanese variety, which they train into curious and fantastic shapes. A rapid and hardy grower; leaves slender, bright, bluish-green, three to five inches long. A very ornamental variety.

Pinus Strobus (White Pine)—This is a beautiful symmetrical, tall-growing tree. Foliage silver-gray underneath. Grows wild in some parts of the country, now and then a tree can be seen growing about the farm, which is the pride and admiration of passersby. A few of these trees lend prominence to the entire surroundings.

	Each	Per 10
2 to 3 feet.....	\$2.00	\$17.50
3 to 4 feet.....	3.00	25.00
4 to 5 feet.....	4.00	35.00

CRYPTOMERIA JAPONICA

Cryptomeria (Japanese Cedar)—A handsome, rapid growing tree with elongated pyramidal outline and plume-like upward spreading branches. The foliage somewhat resembles that of the Norfolk Island Pine. Much prized for its odd and unusual attractive appearance.

	Each
18 to 20-inch.....	\$1.50
20 to 24-inch.....	2.00
24 to 30-inch.....	3.00

Valdesian Nurseries

Bostic, N. C.

Gentlemen:

I am writing to advise that the *Cedrus Deodara* I ordered some days ago arrived in good shape and a fine specimen. I was delighted with it, also the Red Flowering Dogwood came yesterday and was equally as fine. Many thanks.

I should have ordered the Red Dogwood at the time I ordered the *Cedrus Deodara* and let them come along together, but I didn't decide on Dogwood until after order was gone.

I like your plants very much, and your service is very prompt. I shall be glad to recommend you to my friends at all times.

Very truly yours,

N. R. Broughton.

Broad Leaved Evergreens

MAGNOLIA GRANDIFLORA

It has been said that there is no tree which creates such admiration and beauty as the *Magnolia Grandiflora*. The tree begins to blossom in June, and continues through July and August, displaying hundreds of great, large flowers. These beautiful cream-like and bell-shaped flowers emit a very rich perfume that can be detected fully a block away.

We can ship them safely anywhere, having delivered them successfully in far away California and the Isle of Pines. Where wanted we can quote on large specimen trees. Special planting directions are given with each shipment.

	Each	Per 10

12 to 18-inch.....	\$1.50
18 to 24-inch.....	2.50

Abelia Grandiflora (A. Rupestris)—One of the most beautiful poplar and satisfactory broad-leaved evergreens. The graceful drooping stems and branches are covered with dark glossy-green leaves, which in winter assume a metallic sheen. From the middle of May until frost this beautiful little evergreen produces beautiful little bell shaped, cream colored, fragrant flowers that almost cover the plant.

LIGUSTRUMS

The European sorts are especially valuable for ornamental planting. The *Lucidum*, *Nepalensis*, *Japonicum* and *Chinensis* are evergreen in the South, and are valuable for ornamental purposes the whole year through. They are so adaptable to all sorts of exposure and conditions of soil that they should find a prominent place in most all plantings.

Ligustrum Amurense—This is hardy and an evergreen in the South, and while it is mainly *Nepalensis* except its leaves are a little larger, used for hedges, it is now used by some gardeners among shrubbery planted as a broad leaved evergreen. It bears freely of very fragrant and white-cream colored flowers that are, if untrimmed, followed by clusters of little blue berries that hang on until late in the spring.

	Each	Per 10
12 to 18-inch, bushy.....	\$.50	\$ 4.00
18 to 24-inch.....	.75	7.00

Ligustrum Lucidum—A splendid, hardy, evergreen shrub which very much resembles the *Nepalensis* except its leaves are a little larger, yet a lustrous green with somewhat spreading habit, followed by black berries, which hang on through the winter.

	Each	Per 10
12 to 18-inch.....	\$1.25	\$10.00
18 to 24-inch.....	1.75	15.00
24 to 30-inch.....	2.50	25.00

Ligustrum Nepalense—A splendid, hardy, broad-leaved evergreen, which has fragrant and showy flowers. It grows rapidly until it gets a couple of years old when it seems to delight in a greater production of its beautiful glossy-green leaves and fragrant flowers.

	Each	Per 10
12 to 18-inch.....	\$1.25	\$12.00
18 to 24-inch.....	2.00	20.00
24 to 30-inch.....	2.50	25.00

Ligustrum Japonicum—This is a valuable evergreen shrub, but does not have the glossy-green leaves as the other varieties and is much used by landscape gardeners among shrubbery, lending a splendid contrast among other sorts.

	Each	Per 10
12 to 18-inch.....	\$.50	\$ 5.00
18 to 24-inch.....	1.00	10.00
24 to 30-inch.....	1.50	14.00

American Holly (*Ilex Opaca*)—Native variety so familiar in Christmas decorations. Has spikes on the edges of its peculiarly shaped evergreen leaves and makes a striking contrast among other shrubbery. Especially fine for specimen or open ground planting. It is hardy as far north as Pennsylvania.

	Each	Per 10
12 to 18-inch.....	\$1.00	\$ 9.00
18 to 24-inch.....	1.50	14.00
24 to 30-inch.....	2.00	20.00

Ilex Crenata (Japanese Holly)—Closely branched shrub, with small dark green leaves. Can be trimmed in dense formal effect if desired, but will develop into interesting specimens if allowed to grow naturally. Its thriving in partial shade near the seashore, and under city conditions, makes it perhaps one of the most useful of the broad-leaved evergreens.

12 to 15-inch.....	\$1.25	\$12.00
15 to 20-inch.....	2.00	20.00
20 to 30-inch.....	2.50	25.00

VIBURNUM—SNOWBALL

Viburnum Tomentosum Plicatum (Japanese Snowball)—It is hardy and produces great white balls of blooms, and with its handsome foliage it is more used in landscape work.

Viburnum Opulus or Red-berried Snowball—There are a number of attractive varieties of white-flowered and showy-berried Viburnum but the old Viburnum Opulus is by far the handsomest for an all-year shrub as it does not only produce attractive, white blooms but these are followed by shiny, red berries that persist throughout the winter.

Viburnum Opulus Sterilis (Common Snowball)—The old-fashioned sort, producing its large globular clusters of pure white flowers in May and June. Most everybody wants a few, as they bring back memories of the old home, and too, make a very attractive appearance.

	Each	Per 10

Kolkwitzia (Beauty Bush)—New introduction from China. Closely related to Abelia, but perfectly hardy even in Massachusetts. Grows in height 4 to 5 feet, producing in June masses of arching sprays of pink, tubular flowers, almost an inch long and $\frac{3}{4}$ inches in diameter.

	Each
12 to 18-inch.....	\$1.00
18 to 24-inch.....	1.50

PRUNUS TOMENTOSA

This wonderful little ornamental and fruit-bearing cherry is beautiful in blossom, coming into flowers in March in the vicinity of Washington. Blooms very profusely, the branches being covered with flowers which open from pink buds just as the leaves start. Their bright red stalk and calyx make a handsome contrast with the white petals which are often blotched with rose. Later the brilliant red, sometimes white, fruit contrasts well with the rich green foliage.

The bush rarely grows more than five to six feet high.

Under reports from Washington, we find it thrives beautifully practically all over the United States, even in Canada they report success (and no failures so far as we can find where plants have been propagated from bearing trees).

	Each
2 to 2½ feet.....	\$1.50

Prunus Pissardi—Showy, purple leaves, deepening in color toward the end of the season. White flowers in the spring. It is prized for its beautiful colored foliage, and small, round top tree, which at a distance somewhat resembles Japanese Blood-leaf Maple.

	Each
2 to 3 feet.....	\$.75
3 to 4 feet.....	1.00

JASIMUM NUDIFLORUM

This is an evergreen in the South. The stems are a dark shiny green and during mild winter weather regardless of the calendar, its sunshiny clear flowers appear thickly along the branches. It will begin to bear its pretty yellow flowers quite young.

	Each	Per 10
1 year plants.....	\$.25	\$ 2.00
2 year plants.....	.40	3.50

FLOWERING CRAB

(Pyrus)—Chinese Flowering Crab. A small tree with symmetrical broad crown, native of China. Has deep purple flowers and reddish-yellow fruit. Hardy, desirable and early flowering.

	Each
2 to 3 feet.....	\$1.00
3 to 4 feet.....	1.50

FLOWERING ALMOND

Especially suited for planting in mixed borders or in front of shrubbery. A well-known desirable shrub.

	Each
2 to 3 feet.....	\$1.50

POTENTILLA

Potentilla (Fruticosa)—A beautiful, hardy shrub, having distinctive, narrow, fuzzy leaves. Grows to a height of 2 to 3 feet. Rather round in form and succeeds almost anywhere. Has yellow blooms which resemble Hypericum but are not quite so large. Blooms freely from June until frost. Is most valuable for planting among evergreens.

Fruit Trees

APPLES

We can make special prices on most all varieties in quantity lots.

Price 40c each, \$3.50 per 10 unless otherwise noted.

Red June—A well known and good variety, ripening the last of June

Early Harvest—Medium size yellow apple; ripening about harvest time. Tender, delicious and of good quality.

Yellow Horse—Begins to ripen in July and continues until late in August. A good eating and cooking apple.

Fall Pippin—Large, with creamy-white flesh, extra quality.

Baldwin—This is one of the best apples for commercial purposes and justly so, as the tree is a strong grower and produces heavy crops of large fruit of rounded form, deep red in color, flesh rich, crisp and juicy.

Red Limbertwig—Succeeds better in the mountains or hilly sections of the country, where it is a good bearer and one of the best keeping apples. In the cotton belt or lowlands it is a good bearer but does not keep well.

Grimes Golden—Originated in Virginia. Keeps well until last of January. It has a vigorous, upright spreading habit and is an annual bearer of fruit above medium size. Rich golden-yellow with flesh yellow, firm, crisp, aromatic and rich; of the best and most valuable winter sorts.

Mammoth Black Twig—Many claim this valuable variety excels Winesap. It is a better grower, more hardy, the fruit larger, color a darker red and flesh firmer. Valuable keeping variety.

Stayman's Winesap—This variety is attracting much attention and is a profitable market sort, of large size, bright red color, very productive and of the best quality. The tree is a good grower, drooping in habit and adapted to all soil and situations. A good keeping variety.

Red June

PEACHES

Price, 3 to 5 feet, \$3.50 per 10.

Mayflower—The earliest peach. A cling of rich red color which makes it valuable for market and most salable on account of its ripening so early. Excellent for home too, as older people as well as children look forward to the ripening of early peaches. It is said to be one of the best bearers owing to its being the latest to bloom which makes it most free from frost and more certain to bear.

Greensboro—Flesh is very juicy, white and tender, good quality for early variety. Ripens about ten days after the Mayflower.

Red Bird Cling—One of the best early cling peaches. Medium size and valuable early cling.

Bell of Georgia—Large, skin white, with red cheek; flesh white, firm, and of excellent flavor. Free bearer and a good shipper. Rapid growing tree. One of the most popular for both home use and commercial orchards.

J. H. Hale—A fine looking peach. Large, round, yellow, with pink sides, sometimes nearly covered with red. Firm, and a good shipper.

Triumph—The earliest yellow flesh peach. Late bloomer and bears many times when others are killed by the frost. Ripens about the first of July.

Carman—Large free-stone, creamy white with red cheek, flesh tender, white, tinted with red near the seed. Does well in many localities where many peaches fail. It belongs to the hardy North China group. It is like the Elberta, but ripens early in July.

Foster—Yellow meated, free-stone, sweet and juicy and excellent flavor. Fine for home use but not a good shipper. Ripens last of July.

Mayflower

Elberta—Everybody knows this variety and hence it needs no description. Ripens about August first.

Chinese Cling—This is a well known variety, good for home or shipping. Ripens about the time or a little later than the Elberta.

Lemon Cling—Pale-yellow cling with dark red cheek about as large as Elberta. One of the best for eating and canning.

Indian or Blood Cling—Large, dark with deep red veins. Flesh red and very juicy. An old and valuable variety. No better cling grown.

Stinson's October Cling—Large and of fine quality, the best peach in cultivation, either for home or market.

CHERRY TREES

There are few more desirable fruits than the cherry. They are being planted more and more each year and there is always a good demand for them. They make valuable ornamental trees on the lawn as well as being an early ripening fruit. They are strong, vigorous growers with large, glossy leaves that thrive in most any soil. There are not many poor cherries, at least the writer who has seen many varieties has seldom, if ever, found a poor one. No home or garden is complete without a few cherry trees. **Price \$1.00 each.**

May Duke—Large, dark red, juicy, rich and of superior quality.

Ostheim—Large, roundish, of dark red when fully ripe. Flesh tender, juicy, sub-acid and very good. Ripens early and over a long period.

Yellow Spanish—Pale yellow with red cheek. Flesh firm, juicy and ex-

Large Montmorency

cellent, vigorous and very productive; one of the best light colored cherries yet introduced. Ripens in June.

Governor Wood—Large, rich, light yellow with red cheek, juicy and sweet.

Black Tartarian—Very large, purplish-black; very juicy, rich and of excellent flavor. The tree is a well-known and popular variety.

Large Montmorency—Large roundish, red; flesh tender and of good quality. Ten days later than Early Richmond. A most popular kind and one of the best for Western North Carolina.

Early Richmond—An old and well-known variety; ripens early.

JAPANESE PLUMS

This is not only one of the most beautiful and delicious, but one of the most wholesome of all fruits that grow. Even invalids eat them, it is said, with positive benefit. They succeed in almost any kind of soil. This is an excellent dessert fruit, of rich flavor, and unsurpassed for home use and profitable for market. The Japanese varieties are inclined to overbear and should be thinned when about one-third grown. They are extremely hardy and begin to bear while very young. **Price, 75c each, \$7.00 per 10.**

Abundance—Medium to large, bright red over yellow; flesh yellow, firm, juicy and sweet. Comes into bearing while quite young and yields abundantly.

Kelsey—A vigorous and upright grower; very large and productive, being sometimes as large as an ordinary peach. Dark red, firm skin, flesh yellow, sweet, rich and of a very fine quality.

PEAR TREES

When pear trees are heavily laden they should be thinned out when about one-third grown, else the fruit will be poor and the tree injured. The dwarf varieties are especially recommended as they are good growers, coming into bearing very young, sometimes while yet in the nursery rows. Longer lived, of stronger growth and not subject to blight. **Price, 75c each; \$6.50 per 10.**

Early Harvest—Medium size, green ish yellow, sweet and juicy. July.

Bartlett—One of the most popular varieties. It is an excellent eating pear; flesh tender, juicy and good, having a rich and delicious flavor.

Kieffer—Large, golden yellow. Largely planted for commercial purposes, being an early and great yielder. The tree is inclined to break if a part of the fruit is not thinned out, which will not injure the crop or tree, and by all means should be done lest the tree should be damaged.

Seckel—The standard of excellence in pears, small but of highest flavor. This and the Bartlett are two of the best known dwarf varieties.

Garber—A well-known variety and a good bearer.

Magnolia—A good bearer, large and valuable fruit. The fruit is nearly round in form and deep yellow in color, having rich, sweet, juicy and excellent flavor. Ripens last of September.

DWARF PEARS

(Grafted on Quince Roots)

These make beautiful little trees, and are many times planted on the lawn. They do not take up much room, make a beautiful form and are worthy of being planted as ornamental trees. Do not fail to include some dwarf pears with your order. We can supply them in varieties as follows. Seckel, Duchess 'd Angoulême and Bartlett. **Price, \$1.00 each.**

PERSIMMONS

Japanese Persimmon (Tane Nashi)—One of the best known Japanese varieties. Fruit large, smooth, symmetrical and ripens early. Aside from the fruit borne by the Japanese Persimmon trees they also make beautiful ornamental trees.

3 to 4 feet.....	\$1.25	\$12.00
	1.50	15.00

Small Fruits

GRAPES

Grapes are one of the most productive and hardy fruits that we have. They can be grown in small spaces and trained up the sides of buildings or along fences, occupying very little room. Make the soil mellow and plant vines about 6 feet apart.

A Wonderful Grape

Old English Grape—We secured our stock plants of this variety from our friend and horticulturist, Joe DePriest. This grape has been in his immediate family for over one hundred years.

The vine is a strong grower, with large, healthy and fine foliage. It is not often particular in its growth as to its location, as is shown by some of these bearing vines, which this old horticulturist has growing, not only on trellises and arbors, but some of them trained on growing trees, where the fruit ripens to perfection, even among the shady foliage. It is a most delicious variety.

We have had inquiries from various northern and eastern states to know if this variety would succeed there and we certainly believe that it will; and for commercial purposes when the plants can be obtained in sufficient quantity, we believe it will prove the most valuable variety yet introduced. Mr. DePriest says these grapes will hang on the vine until frost, and that they will keep for weeks in perfect condition after being picked. They are almost certain to bear every year.

I do not see how an owner of even a small lot can afford not to plant at least a couple of these vines. **Price, \$1.50 each.**

Concord—The most popular and widely planted black grape. Very hardy and productive. Ripens about the middle of September. Because of its adaptability and low cost of production Concord is widely planted for both home and commercial use.

Niagara—Large, slightly oval; pale yellow with white bloom; the quality is equal to Concord and is the standard white grape of the country. Bunches are large and compact. Vine vigorous, hardy and very productive.

Moore's Early—Very large, round, black with a blue bloom, quality very fine and is classed as better and sweeter than Concord. Extremely hardy and productive.

Price, well rooted vines.....	Each	Per 10
	\$.30	\$2.50

Lutie—Rich red, a good grape; succeeds better in the South; vigorous, heavy bearer and always dependable.

SMALL FRUITS—Continued

Green Mountain—From the Green Mountains of Vermont. Bunches rather large, and shouldered. Berries medium, greenish white; thin skin, juicy with tender and sweet pulp.

	Each	Per 10
Price Lutie and Green Mountain.....	\$.60	\$5.00

Scuppernong—Large, bronze-colored berry. Flesh sweet, pulpy and vinous. The most popular grape on the Southern market. Supply is seldom equal to the demand. Vines produce abundantly. Scuppernong wine is considered among the best.

	Each	Per 10
Price	\$.60	\$5.50

Brighton—Medium in size, red, flesh rich, sweet and of the best quality. Ripens earlier than Delaware. Vinous, vigorous and very hardy. Early.

Delaware—Berries rather small, round, skin thin, light red, flesh juicy without any hard pulp; sweet and spicy and delicious flavor. Vine moderately vigorous, hardy and productive. Mid-season.

	Each	Per 10
Brighton and Delaware well-rooted plants.....	\$.50	\$4.00

BLACKBERRIES

The Crop That Will Make You Money—Quick

Try out one-fourth, or better still, one acre; plant in rows or "hill fashion." Plant in rows 3 feet apart in your orchard. Make every foot of ground pay. Berries bring good prices and will go still higher.

Early Harvest—The first to ripen—a most productive early bearer. Fruit medium size, roundish-oblong. Flesh tender, juicy mild and of good quality. The very early variety.

Snyder—Extremely hardy, enormously productive, medium size, no hard, sour core. Easy to pick, fruit in clusters, mostly on top like raspberries.

Eldorado—Very vigorous and hardy enduring the winters of the Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in clusters, and ripen well together; they are very sweet, melting and pleasing to the taste; have no hard core.

Rathbun—Berries very large; sweet, luscious; have no core and are firm enough to ship and handle well; canes make a strong erect growth, yielding fine crops.

	Each	Per 10	Per 100
Price, strong plants.....	\$.15	\$1.00	\$6.00

DEWBERRIES

Plant in rows six feet apart, three feet distant in the rows keep the soil mellow and clean.

Lucretia—The very best of the dewberry family. Berries are far larger and incomparably better than any blackberry; of unequalled excellence. Ripens early.

	Each	Per 10	Per 100
Price, strong plants.....	\$.15	\$1.00	\$5.00

RASPBERRIES

Raspberries are one of the most delicious and popular fruits grown, are easily cultivated and require little care. Cut out old and weak roots each year. Plant in good soil in hills about 4 feet apart. In large plantings it is advisable to plant them thickly the same as hedge row.

Cumberland—The largest of all the black caps; coal black berries; very firm and quality of the very best; excellent shipper. Bush a strong grower, stocky canes and unusually prolific. Mid-season.

	Each	Per 10	Per 100
Price, strong plants.....	\$.20	\$1.00	\$5.00

St. Regis—Earliest of all, wonderfully prolific; it equals most blackcap varieties; gives a crop of fruit all summer and autumn, fruiting on old canes in generous quantities until late in August, when berries begin to ripen on young canes. Berries bright crimson, of large size and surpassing quality.

	Each	Per 10	Per 100
Price, strong plants.....	\$.15	\$1.00	\$6.00

STRAWBERRIES

Progressive Everbearing—Is without doubt the best everbearing strawberry plant in cultivation. Though it is not a good shipping variety, for home use and local market it is superior to any other sort. It is a good plant maker and will yield fruit the first year, that is truly wonderful.

	Per 100	Per 500	Per 1000
Price	\$1.50	\$6.00	\$10.00

SMALL FRUITS—Continued

Excelsior—Earliest berry in cultivation. Medium size, flesh firm, rich and red, rather tart, but is an unequaled shipper. Largely raised in the South for the Northern markets. Plants very productive. Perfect. Extra early.

	Per 12	Per 100	Per 1000
Price, common sorts strong plants.....	50c	\$1.25	\$6.00

Improved Lady Thompson—This variety has been grown world-wide in great variety of soils, and it seems to succeed quite well. It is early, very large, and quite productive.

	Per 12	Per 100	Per 1000
Price	50c	\$1.25	\$6.00

Can also supply Klondyke and Aroma.

Hardy Climbing Vines

AMPELOPSIS

American Ivy or Virginia Creeper—The well-known native vine with five parted leaves that change to rich crimson in autumn. Berries are a blue-black. Very rapid grower and entirely hardy. One of the finest for covering walls, verandas, trunks of trees.

	Each	Per 10
Price	\$.60	\$5.00

Engelmanni (Engelmann Ivy)—Shorter jointed than Quinquifolia. A good climber, grows 6 to 10 feet in season.

Veitchi (Boston Ivy)—Of Japanese origin, entirely hardy, with foliage turning brilliant red in autumn. It clings tightly to walls, and is unsurpassed as a basket or vase plant.

	Each	Per 10
Strong plants	\$.75	\$6.50

ARISTOLOCHIA (Dutchman's Pipe)

A Sipo—A magnificent vine of climbing habit, with beautiful foliage, 8 to 10 inches in diameter and curious-shaped, yellowish-brown flowers.

	Each	Per 10
Strong plants	\$.75	\$6.50

Hall's Japan Honeysuckle (Lonicetra Halliana)—Pure white and creamy-yellow, very fragrant flowers that bloom the entire season. Almost evergreen. Besides its ordinary use as a climber, it is valuable for covering banks, bare places, etc., where grass will not grow.

	Each	Per 10
1-year, strong	\$.30	\$2.50
2-year, strong50	4.00

BIGNONIA (Trumpet Vine)

B. Radicans (American Climbing Trumpet Vine)—A splendid hardy climbing plant with large trumpet-shaped scarlet flowers.

	Each	Per 10
Strong 2-year old plants	\$.60	\$5.00

Prices on all the roses above and on page 27: Each, 60c; per 10, \$5.00.

CLEMATIS

A beautiful class of hardy climbers, excellent for pillars or trellises. They delight in a rich soil and sunny situation and are perfectly hardy.

C. Paniculata—A vine of very rapid growth, quickly covering trellises and arbors with handsome glossy-green foliage. The flowers are of medium size, pure white, borne in immense sheets and of a most delicious and penetrating fragrance.

	Each	Per 10
Strong 2-year old plants.....	\$.50	\$4.00

LARGE FLOWERING CLEMATIS

They need deep, rich soil, plenty of moisture. Free flowering, hardy plant.

Mme. Baron Villard—Beautiful pink.

Ramona—Light blue.

Mme. Ed Andre—Red.

	Each
2 year plants.....	\$.60

WISTARIA

The Wistaria is one of the most decorative of vines, and for porch decoration without too much shade it has no superior. The long twining branches bear great sprays of foliage, while its charming flowers sway with every passing breeze.

HARDY CLIMBING VINES—Continued

W. Sinensis (Chinese)—Flowers in clusters, pale blue, sometimes gives a second crop of flowers in the fall.

	Each	Per 10
Strong 2-year old plants.....	\$.50	\$4.00

W. Sinensis Alba—Of similar habit to Chinensis, with pure white flowers.

	Each	Per 10
Strong 2-year old plants.....	\$.50	\$4.00

EVERGREEN VINES

In most varieties of vines we can supply either field-grown or pot plants. If it is desired that these plants should be moved during the summer months, it is best to get pot grown plants. Would be glad to quote on pot-grown plants on request. The prices quoted are on field grown plants for shipment while dormant from September to May.

Euonymus Vegetus (Bigleaf Wintercreeper)—Bushy, interesting growth. Small, nearly round leaves. Bright scarlet fruit, freely produced. Handsome among evergreens. Also called Evergreen Bittersweet.

	Each
10 to 12 inch.....	\$.40
12 to 15 inch.....	.60
15 to 18 inch.....	.75
18 to 24 inch.....	1.00

Euonymus Radicans (Variegated)—Like Euonymus Radicans with the exception of its beautiful variegated foliage which is about half green and half yellow. Fine for vases, baskets and borders.

	Each	Per 10
Price	\$.50	\$4.00

Vinca Minor (Periwinkle or Blue Myrtle)—Has deep glossy evergreen leaves, with blue flowers. Fine for ground covering, or mounds.

	Each	Per 10	Per 100
Price, 2-year bushy plants.....	\$.35	\$3.00	\$25.00

Roses

Hardy Everblooming Varieties

Los Angeles

Caroline Testout—Clear rose-pink. Flowers large, well formed, full with petals of good substance. Freer in growth and bloom than the Killarney.

The everblooming roses are especially desirable for their profuse and continuous bloom, fragrance of their bloom, and the delicate beauty of their buds.

Killarney Pink—One of the most beautiful roses grown, strong, vigorous and perfectly hardy. Flowers are very large, buds long and pointed. Color an exquisite shade of deep sea shell pink.

Ophelia—Brilliant salmon-flesh shaded with rose on outer edge of

petals with a heart of glowing peach-pink and orange-yellow blendings. Fragrant as Richmond. Perfect flowers on long stiff stems. Free from mildew.

Sunburst—This magnificent, grand, yellow rose ranks in value and grandeur with the American Beauty. Pointed buds, color, orange-copper or golden and orange-yellow, extremely brilliant in effect. This is the finest yellow rose in cultivation and pleases everyone who sees it. Many grow it in preference to White American Beauty and other leading roses. It puts all the yellows to sleep when it comes to bedding in the garden.

Mrs. Chas. Russell—A fine new rose of American origin, considered equal to and we believe better than the American Beauty. Has strong large buds, produced on long stiff stems. It is crowned with a bloom of a beautiful shade of rosy-pink. Blooms large, double with full and magnificent formation.

Jonkheer J. L. Monk—This grand rose is one of the strongest growers in the Hybrid Tea class. Blooms are produced with the greatest freedom, carried on long stiff stems, and are of large size, of perfect formation and highly perfumed. Clear pink.

Mme. Butterfly—Admired by thousands. All the color tones of Ophelia are intensified, making it a harmony of bright pink, apricot and gold. It averages more petals to the bloom; produces more blooms to the plant because it makes more branches, every one carrying a bud. The buds are a lovely shade of Indian oak, yellow at the base; the opening flowers are perfect in form and texture, and of delicious fragrance.

Sensation—The most brilliant shade of red. Long-pointed buds; the flowers are beautiful, of extreme size and good color to the last. Long stout stems, with pretty foliage.

Lady Hillingdon—At the Detroit Rose Show, 1912, this rose was awarded the sweepstakes over all yellow roses. Has long, slender, pointed buds of deep golden-yellow, and retains its showy yellow color better than Sunburst. A good grower. Produces an immense quantity of blooms.

Radiance—Brilliant rosy-carmine, displaying beautiful, rich, pink tints in the open flower; fine form, large and full, with cupped petals. Large brilliant buds; abundant dark green foliage. Constant bloomer, delightfully fragrant. Almost immune from disease.

Red Radiance—Clear red without a trace of any other color. Remarkable bloomer, being constantly in flower from early spring until frost.

Paul Neyron—Deep, shining rose, very fresh and pretty; large flowers often measuring four to five inches across, claimed to be the largest pink rose in cultivation.

Columbia—Beautiful pink, deepening as it matures. One of the grandest pink roses either for cut flowers or bedding.

Gruss an Teplitz—A most beautiful rose. The color is brightest scarlet, shading to deep, rich velvety crimson. A free grower and a profuse ever-bloomer.

Radiance

ROSES—Continued

Frau Karl Druschki (White American Beauty)—Snow-white flowers of immense size; splendid buds and large flowers, perfectly double, delightfully fragrant. Healthy and vigorous grower, entirely hardy, and abundant bloomer. Said to be the most beautiful and satisfactory snow-white perpetual blooming rose.

Francis Scott Key—A desirable variety; heavy double flowers of great substance; rich in color; good grower and a valuable variety. Constant bloomer and unequalled for cut flowers, opening perfectly and worthy of a place in every rose garden.

Prices on all the roses above and on page 27, each 60c; per 10, \$5.00.

Mrs. Aaron Ward—Deep golden orange, shading to cream; standard yellow.

Mrs. A. R. Waddell—Deep, rich apricot-yellow.

Luxemburg—Fine, large, double rose; rich golden-yellow.

Alexander Hill Gray—Color lemon-yellow, perfectly formed, fragrant flowers. Blooms freely in autumn.

Miss Amelia Gude—Long, pointed buds, color deep yellow, shading to cream; fragrant. Very free bloomer.

Crusader—Fine, large, free flowering. Double. Velvety-crimson.

Briarcliff—Very large, long pointed flowers. Light rose-pink; borne singly on long stems.

Kaiserin Augusta Victoria—Bears fine, large flowers. Light cream color.

Frau Karl Druschki

	Each	Per 10
1-year plants	\$.30	\$2.50

ROSA RUGOSA

This class of roses is especially adapted to hedge or for shrubbery collections. The splendid foliage, flowers and later the seed pods, makes this class one that should be more largely used in landscape work.

Rugosa Alba—Single, pure white.

Rugosa Alba—Single, deep rosy carmine.

	Each	Per 10
Price	\$.40	\$3.00

Golden Rambler—One of the prettiest ramblers, has golden yellow flowers. Very popular variety.

	Each	Per 10
2 year strong runners	\$.75	\$7.00

CLIMBING ROSES

Paul's Scarlet Climber—Flowers a vivid scarlet, good size, semi-double, produced in clusters, the plant being literally covered with bloom. Strong climbing habit and perfectly hardy. One of the most popular climbing roses.

	Each
2 year plants	\$.50

3 year plants	1.00
---------------------	------

Christine Wright—Bright rose-pink; perfect form; blooms singly and in clusters; profuse during June and more or less throughout the season; strong climbing habit; dark green foliage.

	Each
1 year plants	\$.25.

2 year plants50
---------------------	-----

Pink Dorothy Perkins—A splendid new climbing rose. In foliage and habit of growth it is remarkably like Crimson Rambler. The flowers are double, of good size, and borne in clusters. The petals are very prettily rolled back and crinkled, the buds remarkably handsome, color a clear shell-pink and holds a long time without fading.

Red Dorothy Perkins—The flowers are very double, produced in large trusses of thirty to forty and almost every eye on a shoot produces clusters of flowers. The color is intense crimson maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

White Dorothy Perkins—This beautiful rose is the counterpart of the well-known Dorothy Perkins, except in the color, is pure white, but it is quite as hardy and vigorous. It has now become a universal favorite.

Silver Moon (Hardy Climber)—Blooms very large, three or four inches in diameter, pure white in color and of good substance, beautifully cupped, forming a clematis-like flower.

	Each	Per 10
1 year old	\$.35	\$3.00
2 year old50	5.00

CLIMBING ROSES—Continued

Dr. W. Van Fleet—Flowers, when open, run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full double, of delicate perfume, buds pointed. A strong and rapid grower.

	Each	Per 10
1 year	\$.35	\$3.00
2 year75	7.00
3 year	1.00	9.00

Climbing American Beauty—The great and popular American Beauty Rose in a real climbing form. It has all the characteristics of its relative, including form and fragrance.

	Each	Per 10
1 year plants.....	\$.35	\$3.00
2 year plants.....	.65	6.00

American Pillar—Large single flowers of rich rosy-pink, approaching brilliant carmine, golden-yellow stamens and profuse bloomer. Originated in the U. S. Government Department of Plant introduction.

	Each	Per 10
2 year strong runners.....	\$.50	\$5.00

Climbing Columbia—Vigorous grower; color bright pink.

Climbing Sunburst—Deep salmon-yellow; long pointed buds.

	Each	Per 10
One year plants.....	\$.30	\$2.50

PEONIES

They are perfectly hardy. Require no protection in the severest weather, and will thrive in all kinds of soil, succeeding better in a deep mellow soil, which, if not already, can easily be made so when planting.

Theodore Roosevelt—Semi-rose type; mid-season. A variety purchased in England under number (1) and named in Holland for our ex-president. It is a deep, rich, brilliant red in color, different from any red we know and a grand peony.

Sarah Bernhardt—Usually large, perfectly double rose-formed flowers in clusters, color of apple blossom, fragrant.

	Each	Per 10
Price 2 to 3 eyes.....	\$.75	\$7.00

Festiva Maxima—Generally considered the finest white Peony grown. Though an old variety, it has never been surpassed, and the true variety is always scarce. Color snow white, center petals touched purplish carmine, enormous, full double bloom, very broad petals, handsome foliage.

Grover Cleveland—Large, double, brilliant crimson, from mid-season to late variety. Is a good keeper, fine for cut flowers and one of the best sorts.

Mons. Jules Elie—Very large and full globular flower, finest glossy fresh pink, deepening at the base of the petals, reflex silvery pink, broad overlapping petals, strong, vigorous grower and free bloomer, probably the finest and most perfectly formed pink Peony in existence.

	Each	Per 10
Price, 2 to 3 eyes.....	\$1.25	\$10.00

Bulbous Plants

DAHLIAS

Mina Burtle—Originated by Mr. Burtle, a Dahlia grower of California. It is claimed that this variety is the best yet introduced. Produces flowers of gigantic size and remarkably beautiful. Color a glowing and most brilliant scarlet. Flowers are of perfect decorative type, and are borne on long stems well above the foliage.

	Each	Per 10
Price	\$.50	\$4.00

Golden West—A fine, large, bronzy yellow. Grows to immense size, measuring 6 to 7 inches across; one of the finest cut flower varieties; strong bulbs that will flower first season.

Strong bulbs.....\$1.00 each, 6 for \$5.00

Mme. Henri Cayeux—A reliable variety, flowers are of the largest size with long narrow florets, forming a bloom of magnificent form. Color is a beautiful rich pink, daintily-tipped white.

	Each	Per 10
Price	\$.50	\$4.00

BULBOUS PLANTS—Continued

Stern—A bright primrose-yellow. Said to be superior to the Golden West, which we have grown seven to eight inches in diameter. Flowers large, long and pointed. One of the most satisfactory varieties.

	Each	Per 10
Price	\$.50	\$4.00

Winsome—Pure, cream-white, better than White Swan which is claimed to be one of the best white Dahlias.

	Each	Per 10
Price	\$.35	\$3.00

LILIUM TIGRINUM

The old-fashioned "Tiger Lily." A showy, bright orange lily with black spots, blooms freely outdoors in midsummer.

	Per Doz.
Price	\$2.50

TULIPS

Single or double, per 10.....\$.60

GLADIOLI

The great advancement recently effected in the size and colors of the blossoms justly entitle the Gladiolus to the position it now holds, aristocrat of the border.

The amateur gardener appreciates its sure blooming qualities, the stored up nourishment in the bulb making certain its vigorous growth. Seldom attacked by insects or disease, it blooms under conditions which would discourage any less hardy bulb plant.

We supply only, all color mixture, which includes every imaginable color, in big large bulbs that will bloom freely the first season.

	Each	Per 10	Per 100
Price, dormant bulbs.....	\$.10	\$.50	\$4.00

CALADIUM

Caladium, Fancy-leaved—Splendid ornamental foliage, dying down outdoors through the winter. Leaves of the brightest colors—red, green, yellow, purplish, and some almost transparent white. They are grand house plants and fine for window boxes.

	Each
Bulbs	\$.35
Plants from four-inch pots.....	.60

NARCISSI

Narcissi are fast coming to the front. They are easily grown and are unexcelled for beauty, fragrance, hardiness and value when cut for decorative purposes. Narcissi are perfectly hardy; they do well planted in any location and increase in size and flower year after year. For outdoor culture plant bulbs in October, November, or December, 5 or 6 inches apart, according to size of bulbs. Never use fertilizer.

	Each	Per 10
Strong bulbs	\$.08	\$.75

AMARYLLIS HYBRIDS

Amaryllis Hybrids—Magnificent large blooms, 8 to 9 inches across, borne in clusters on long stems. The colorings vary from white to darkest crimson.

	Each
Bulbs	\$.75

SUPERB HARDY PHLOX

Brilliant summer effects may be produced with these easily grown, hardy perennials. They commence blooming in early summer, and if early midseason and late varieties are chosen and the flowers cut off as they fade they will bloom quite late. They succeed in almost any position or soil, but give best results in a rich, mellow soil, well prepared. Plant 18 inches to two feet apart. After three or four years take them up, divide the clumps, remove any dead portions and replant. A winter mulch of old manure is a great benefit.

Bridesmaid—Pure white with large crimson center.

Lavogue—Pure mauve-pink with red eye.

Richard Wallace—Pure white with violet center.

Snowstorm—Beautiful white.

	Each	Per 10
Strong plants	\$.30	\$2.50
Mixed, all colors25	2.00

Miscellaneous Hardy Perennials

DELPHINIUM

Hardy Larkspur—Produces tall spikes of dainty, spurred flowers in June and at intervals till frost if cut as they fade.

	Each	Per 10
Large Flowering	\$.25	\$2.00

YUCCA—Adam's Needle

(Filamentosa)—Among hardy ornamental foliage and flowering plants this can be classed at the head of the list. Its broad sword like foliage and tall branched spikes of large, fragrant, drooping, creamy-white flowers during June and July make it an effective plant for all positions, easy to grow and with little care.

	Each	Per 10
Strong plants	\$.25	\$2.00

Variegated Yucca Filamentosa—The sharp-pointed leaves are of a deep, rich green, while the margins are of creamy-yellow. Absolutely hardy, even withstanding the cold northern winters without protection, the same as Yucca Filamentosa.

	Each	Per 10
Two year plants	\$.50	\$5.00

TRITOMA

Pfitzerii (Ever-blooming)—The best variety. The flower spikes, which are produced with considerable more freedom than the old variety, grow as high as three feet, with blooms 6 to 10 inches long, which are of a rich orange-scarlet, shading to a salmon-rose on the edge.

	Each	Per 10
Strong plants	\$.25	\$1.50

HOLLYHOCKS

Hollyhocks—Few hardy plants combine as many good qualities as the Hollyhocks. For planting in rows or groups on the lawn or for interspersing among shrubbery they are valuable. The flowers form perfect rosettes of the most lovely shades of yellow, crimson, rose, pink, orange, white, etc.

	Each	Per 10
Two year strong plants	\$.25	\$2.00

GERMAN IRISES

German Irises (Fleur-de-lis)—German Irises succeed in partial shade, but produce their best in full sun. They are not particular as to soil, will grow almost anywhere, but do best in well drained rich loam or garden soil, succeeding in quite dry locations. Colors white, pink, blue and yellow.

	Each	Per 10
Strong bulbs	\$.25	\$2.00
Japanese Iris—Mixed colors	50c each, six for \$2.50	

MALLOW MARVELS

Mallow Marvels—In brilliancy of color and profusion of bloom they surpass all other summer blooming perennials. They bloom during the hot, dry weather better than almost any other flower, making bushy plants 4 to 6 feet high in one season. In winter cut off the old stalks to within 4 to 6 inches of the ground and they will come up again in the spring. We have found that a moist soil of average fertility with good cultivation gives better flowers than very rich soil, which sometimes causes so much top growth. Colors red, pink, and white.

	Each	Per 10
Two year strong plants	\$.30	\$2.50

GOLDEN GLOW

Golden Glow (Rudbeckia)—A fine, hardy plant that should find a place in every garden. It will be found excellent for cut flowers. Plant attains a height of four to six feet and will produce hundreds of large blossoms, very double and of brilliant golden-yellow during August and September.

	Each	Per 10
Price	\$.25	\$2.00

LILY OF THE VALLEY

Lily-of-the-Valley—This wonderful Lily will thrive and throw up its beautiful, modest, fragrant white bells in any kind of soil. It will make a carpet of refreshing green, daintily patterned by its pervading flower sprays, in the shady and cool places otherwise lost to ornamentation around every house.

	Each	Per 10
Price	\$.10	\$.75

SHASTA DAISIES

Shasta Daisies—The plants are as strong as a common field daisy, very tall, well branched, fine cut foliage and huge white flowers borne in profusion on long stiff stems. Flowers are pure white with gold center, petals very long and center soft and velvety. Hardy plant and one of the novelties that has come to stay.

	Each	Per 10
Price	\$.20	\$1.50
